

Temporary Pavement Marking

Temporary Pavement Marking Paint and Beads

Updated – 11-10-05

Traffic Paint –

Any commercially available traffic paint shall be acceptable, if the plans or special provisions do not specify the type. The paint shall be commercially available traffic paint capable of receiving and holding glass beads for producing reflectorized traffic markings. The paint shall be furnished ready mixed and shall not be diluted or thinned. The paint shall be compatible with drop-on glass beads. The color for white paint after drying shall be a flat white, free from tint, furnishing good opacity and visibility. For yellow, the color shall closely match Color Chip 33538 of Federal Standard 595.
